The aim of the ICPIC 2022 Congress is the exchange of multidisciplinary knowledge on an application of polymers “in concrete” and “on concrete”: from the modification of the composition of the concrete using modern admixtures and additives, through alternative binders (e.g. geopolymers, sulfur concrete, etc.), polymer composites for the reinforcement of concrete (e.g. fibers and FRP bars and FRP strengthening systems), improvement of the properties of the concrete surface (e.g. impregnation, hydrophobization and coatings) to special properties like self-healing, self-cleaning or energy consumption control with PCM (Phase Changing Materials).

Important part of ICPIC Congress 2022 will be Special Symposium under title “C-PC in Circular Economy: Searching for a New Paradigm” organized by Building Research Institute (ITB) under chairmanship of Professor Lech Czarnecki.

I hope we will meet in Warsaw in 2022.

Andrzej Garbacz
Congress Chairman
